13-Week Roadmap

From AI Foundations to Agentic AI & Deployment

AI Foundations

W-1

LLM & AI
Foundations

W-2

Python for AI
Development

W-3

Git &
Developer
Workflow

W-4

Advanced Prompt
Engineering

Foundation → Understand how AI works and start building

Gen AI Applications

W-5

RAG
Fundamentals

W-6

Advanced RAG
Systems

W-7

Memory &
Stateful AI

Build → Give AI knowledge, context and memory

Agentic AI

W-8

Agentic Thinking
& Planning

W-9

Model Context
Protocol (MCP)

W-10

LangGraph & AI
Workflows

Integrate → Build AI systems that plan, use tools and execute workflows

Production & Capstone

W-11

UI & AI
Integration

W-12

Production-
Ready AI Systems

W-13

End-to-End
Capstone Project

Deploy → Build, integrate, deploy and showcase

About LLM Axis

LLM Axis

LLM Axis is a global AI training and consulting company empowering students, job seekers, and professionals through industry-standard, project-based learning. Specializing in Generative AI and Agentic AI, we deliver live, hands-on programs with real-world applications and expert mentorship. We also partner with businesses worldwide to provide AI consulting, custom solutions, and corporate training—enabling both individuals and organizations to stay competitive and thrive in the AI-driven economy.

Gen AI & Agentic AI Program

From Beginner to Job-Ready AI Developer in 13 Weeks

Start with the fundamentals and build your way up to real-world Generative AI and Agentic AI applications. Learn Python, LLMs, Prompt Engineering, RAG, Vector Databases, AI Agents, APIs, and Cloud Deployment through hands-on projects and practical industry use cases. By the end of the program, you'll have built and deployed real AI applications, developed a portfolio of projects, and gained the practical skills and confidence to pursue opportunities in the fast-growing GenAI and AI engineering space.

Curriculum Overview

Week 1 – Foundations of LLMs & AI Thinking

Understand how modern AI and Large Language Models work, explore tokens, parameters, next-token prediction, prompting, hallucinations, and real-world AI applications.

You'll cover

**1 - LABS, 1 - ACTIVITIES, 2 - DEMOS,
1 - ASSIGNMENT**

Week 2 – Python for AI Development

Build the programming foundation needed for AI development by learning Python fundamentals, data structures, functions, JSON handling, APIs, and file operations.

You'll cover

**1 - LABS, 1 - ACTIVITIES, 2 - DEMOS,
1 - ASSIGNMENT**

Week 3 – GitHub & Developer Workflow

Learn how professional developers manage code, collaborate on projects, maintain repositories, and follow version control best practices.

You'll cover

**1 – LABS, 1 – ACTIVITIES, 2 – DEMOS,
1 – ASSIGNMENT**

Week 4 – Advanced Prompt Engineering

Master advanced prompting techniques to build more reliable AI applications using system prompts, role prompting, few-shot learning, structured outputs, and prompt patterns.

You'll cover

ChatGPT

Claude

Copilot

ANTHROPIC

**1 – LABS, 1 – ACTIVITIES, 2 – DEMOS,
1 – ASSIGNMENT**

Week 5 – RAG Fundamentals

Learn how AI applications retrieve and use external knowledge through embeddings, vector databases, chunking, retrieval, and document-based AI systems.

You'll cover

LangChain

Hugging Face

Chroma

**1 – LABS, 1 – ACTIVITIES, 1 – DEMOS,
1 – ASSIGNMENT**

Week 6 – Advanced RAG Systems

Take RAG systems to the next level by improving retrieval quality with advanced chunking strategies, metadata filtering, hybrid search, and optimization techniques.

You'll cover

LangChain

Pinecone

Chroma

**1 – LABS, 1 – ACTIVITIES, 1 – DEMOS,
1 – ASSIGNMENT**

Week 7 – Memory & Stateful AI Systems

Build intelligent AI applications that remember conversations, manage context, and maintain state across interactions using short-term and long-term memory systems.

You'll cover

LangChain

LangGraph

OpenAI

**1 – LABS, 1 – ACTIVITIES, 1 – DEMOS,
1 – ASSIGNMENT**

Week 8 – Agentic Thinking & Planning

Learn how AI agents think, plan, break down complex tasks, and use tools to autonomously execute multi-step workflows.

You'll cover

LangChain

LangGraph

MCP

OpenAI

**1 – LABS, 1 – ACTIVITIES, 1 – DEMOS,
1 – ASSIGNMENT**

Week 9 – Model Context Protocol (MCP)

Explore the Model Context Protocol and learn how AI applications connect with external tools, share context, and orchestrate multiple capabilities.

You'll cover

python™

Gemini

MCP

LangChain

**1 – LABS, 1 – ACTIVITIES, 1 – DEMOS,
1 – ASSIGNMENT**

Week 10 – LangGraph & Workflow Systems

Design structured AI workflows using graph-based execution, nodes, edges, deterministic flows, and agent orchestration.

You'll cover

python™

MCP

crewai

Autogen

**1 – LABS, 1 – ACTIVITIES, 1 – DEMOS,
1 – ASSIGNMENT**

Week 11 – UI Development & Integration

Transform your AI applications into interactive web experiences by building user interfaces, integrating APIs, improving UX, and preparing applications for deployment.

You'll cover

**1 – LABS, 1 – ACTIVITIES, 1 – DEMOS,
1 – ASSIGNMENT**

Week 12 – Production-Ready AI Systems

Learn how to prepare AI applications for real-world usage with logging, error handling, rate limiting, performance optimization, cost control, and scaling.

You'll cover

**1 – LABS, 1 – ACTIVITIES, 1 – DEMOS,
1 – ASSIGNMENT**

Week 13 – Capstone Project

Bring everything together by designing, building, integrating, deploying, and presenting a complete end-to-end AI application as your final capstone project.

You'll cover

**1 – LABS, 1 – ACTIVITIES, 1 – DEMOS,
1 – ASSIGNMENT (CAPSTONE)**

WHO CAN JOIN THIS PROGRAM?

- 1. Job Seekers** – Build in-demand AI skills and get job-ready
- 2. Working Professionals** – Upskill and stay ahead in the AI era
- 3. Students** – Build practical skills before entering the industry
- 4. Founders & Business Owners** – Leverage AI to grow and scale faster

Trainer's Profile

**AI Practitioner, Trainer, Entrepreneur,
Leadership Coach & Trusted Advisor**

**Senior Software Engineer
Amazon
June 2022 - Feb 2024**

**Tech Lead
Microsoft
Aug 2017 - Feb 2019**

**Trained 3,000+ professionals &
students across the Globe**

**Ganesh Adabala
Founder at Gyaanlytics AI
16+ Yrs of Global Experience**

Ganesh Adabala is a seasoned **Data & AI Trainer** with **15+ years** of global technology experience across companies such as **Microsoft, Amazon, Eurofins, and Neudesic**. He specializes in helping organizations and professionals adopt **Generative AI, Agentic AI, Data Analytics, and Cloud technologies** to build business-ready solutions that create measurable impact.

Ganesh blends **practitioner expertise + hands-on teaching** to make complex AI concepts practical, accessible, and immediately applicable. His delivery style emphasizes **real business use cases**, workflow integration, tool-based execution, and ROI-driven adoption.

Trained across:

Deloitte.

 **Pretium**

((CENTRIC))

 **accenture**

LLM Axis

What learners gain (Out comes):

- 9+ GitHub projects
- Industry standard resume with AI Portfolio
- Dedicated Interview & Placement Assistance
- Practical hands-on experience on Modern AI Tech Stacks

Why enroll:

- Modern AI stacks Like: **MCP, RAG Systems, AI API Integrations, Multi Agent Systems, etc**
- Guidance from Industry Leaders
- Project based learning approach
- Weekly assignments & Live Lab activities
- Real deployments
- For all backgrounds

Sample Certificate

CERTIFICATE

Of Completion awarded to

Your Name

For successfully completing the **Gen AI & Agentic AI Program** covering:

- LLM Fundamentals & Advanced Prompt Engineering
- Python, APIs & AI Application Development
- RAG, Memory & Stateful AI Systems
- Agentic AI, MCP, LangGraph & Multi-Agent Workflows
- Production-Ready AI Systems & End-to-End Capstone Project
